EMPLOYMENT HISTORY

Software Developer

Propel Ventures

February 2020 – June 2020

- Researched design principles and shared my findings with other team members
- Participated and contributed to database and software design discussions
- Built new features quickly and effectively by following InVision designs
- Investigated and resolved issues in the software while updating clients of their progress
- Worked closely with a small Scrum team to collaborate and share knowledge and ideas

Software Developer

Ascender PeopleStreme

May 2017 – January 2020

- Primary developer on a job board rewrite project
- Assisted in the company decision to use ReactJS for future projects
- Worked with the major features group in an Agile Scrum environment
- Proposed new software features to improve product sales
- Developed mobile responsive pages for Android and iOS
- Analysed security risks in the software and propose solutions
- Customised software based on client's requirements
- Wrote unit tests on existing and new code
- Provided training and support for new employees
- Handled consecutive projects using both old and new technologies
- Provided Helpdesk Support at a developer level while maintaining internal Service-Level Agreements

Web Development Intern

2and2

Sep 2016 – Nov 2016

- Gained knowledge in Git for version control
- Worked with other developers simultaneously
- Gained experience uploading websites to staging servers
- Created mobile responsive websites
- Tested on mobile and desktop devices
- Worked in a timely manner to meet client deadlines

Projects:

Department of Finance – GovCMS

- Adjusted SCSS files of their new webpage to mimic the styles of their pre-existing website
- Implemented a video player using Videogular framework for AngularJS

Headspace – Food For Thought

- Styled the webpage using Jade and Less, while replicating the styles given to me in a mockup
- Changed some functionality using CoffeeScript and AngularJS

Freelance Web Developer (Work Experience)

2014 – 2016

- Communicated directly with clients to gain an understanding of their business requirements
- Designed mockups of the proposed website
- Applied feedback from the client to ensure business requirements are met

Projects:

South Coast Tyre Recycling

- Ensured the website was mobile responsive by using Bootstrap

- Used PHP and MySQL to create a Content Management System for administrators to continue to update and maintain the website

Nutrition Care Services

- Created website using WordPress Content Management System
